

On Top of Technology

Advanced Technology Support

As the nation's leading packaging and shipping franchise, Navis Pack & Ship uses a unique and powerful web-based tool called NavisConnect™. The software program streamlines the day-to-day operations of your business and simplifies estimating, ordering and tracking shipments. NavisConnect provides our franchise owners with a comprehensive software system that will increase market penetration and will help facilitate your growth.

Harness the Power of Technology

The automated estimator in NavisConnect was designed with almost 30 years of real-world commercial packaging and shipping knowledge. Plus, NavisConnect integrates with other software tools you'll use everyday in your business. With web access and a user ID and password, you will have access to all of these functions through one integrated web portal.

- **Sharing Data with Network Partners and Customers**

Accurate and Automated Estimates

Every new job begins with an automated estimate. NavisConnect harnesses the packaging engine, your customer database, job templates, online freight options and costs to quickly create an estimate. Quicker and more accurate quotes allow you to provide the best possible estimates to your customers in the least amount of time. With NavisConnect, you can also customize costs with an easy-to-use markup engine, ensuring your costs and margins are always accurate.
